

TASK FORCE ON COMBATING HUMAN TRAFFICKING

NATIONAL ACTION PLAN ON COMBATING HUMAN TRAFFICKING

for the period 2015-2017

adopted by the Austrian government

coordinated by the
Federal Ministry for European and International Affairs

INTRODUCTION

Human trafficking is a grave violation of the most fundamental human rights. The actual number of victims as well as the illegal financial profits of the perpetrators can only be estimated, however, available data¹ clearly suggest that trafficking in human beings is one of the most profitable illegal business sectors with a comparably low risk for the perpetrators: estimated annual revenues of at least 32 Billion US-Dollars² compare with only a few convictions. Furthermore, only a small number of victims are actually identified as such.

Austria is affected by human trafficking both as a transit country and target destination. Human trafficking in Austria predominantly involves cases of sexual exploitation, labour exploitation, forced begging and child trafficking. Most of the victims are nationals of eastern EU member States and other European third States, some from Africa (mostly Nigeria) and Asia (mostly Philippines). The victim protection institutions LEFÖ-IBF, MEN VIA and other NGOs, as well as “Drehscheibe” established by the City of Vienna’s Municipal Department 11 provide care and support for a total of 250-300 individuals per year.

Austria is a party to all relevant international legal instruments on combating human trafficking including the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organised Crime (UNTOC) since 2005 and the Council of Europe Convention on Action against Trafficking in Human Beings since 2006. By 1 August 2013 Austria has implemented EU-Directive 2011/36/EU on preventing and combating trafficking in human beings and protecting its victims.

To reflect a comprehensive approach in combating human trafficking, the Task Force on Combating Human Trafficking (TF-HT) was set up as the Austrian coordination mechanism by a Ministerial Council Resolution (cf. item no. 22 of the Council Resolution Minutes No. 70 of 9 November 2004) headed by the Federal Ministry for Europe, Integration and International Affairs. Within the Task Force, representatives of all competent ministries, the federal provinces and non-governmental organisations (NGOs) cooperate closely. On 10 March 2009, an Austrian Diplomat, Director General Ambassador Dr. Elisabeth Tichy-Fisslberger was appointed first National Coordinator on Combating Human Trafficking (cf. item 13 of the Council Resolution Minutes No. 10) and chairperson of the Task Force on Combating Human Trafficking. Within the Task Force, individual working groups on child trafficking (headed by the Federal Ministry for Family and Youth), prostitution (headed by the Federal Ministry for Education and Women) and on labour exploitation (headed by the Federal Ministry for Labour, Social Affairs and Consumer Protection) have been set up.

The main tasks of the TF-HT and its working groups include the preparation and implementation of the Austrian national action plans as well as regular reporting to the Federal Government, the National Assembly and the European Commission. Moreover, the Federal Ministry for Europe, Integration and International Affairs annually organises a public event on the occasion of the EU Anti-Trafficking Day in October. The Task Force serves as the national contact point for, *inter alia*, the EU, international organisations and governments of third States.

Annual and triennial reports cover the work of the Task Force and all activities related to combating human trafficking.³ The First Austrian Report on Combating Human Trafficking for the period of 2007-2009 (cf. item 13 of the Council Resolution Minutes No. 10) was adopted on 10 March 2009, the Second Austrian Report for the period of 2009-2011 on 20 March 2012 (cf. item 20 of the Council Resolution Minutes No. 135). The Third Austrian Report on Combating Human Trafficking for the period of 2012-2014, as well as the National Action Plan 2015-2017 and the reports of the working groups on child trafficking, prostitution and labour exploitation will be submitted to the Austrian Government and National Assembly.

The working groups on child trafficking and prostitution were set up in 2007 and have already produced two reports (for the period of 2007-2009 and 2009-2011) preceding the recent report for the period of 2012-2014. The working group on human trafficking for the purpose of labour exploitation was set up in 2012 and will submit a report for the first time this year. All three working groups proved to be very useful platforms for information exchange and discussions as well as for the operative implementation of practical measures. Hence, the next national action plan envisages their continuation.

Close collaboration with the federal provinces, whose representatives are members of the Task Force and its working groups, is of key importance. The second annual event with representatives of the federal provinces was held on 8 July 2013 in Graz and the third annual event on 3 June 2014 in Linz. In the course of the evaluation of the implementation of the Council of Europe Convention on Action against Trafficking in Human Beings by Austria, the Council of Europe Expert Committee GRETA visited Austria on 11 December 2014.

Representatives of civil society, including non-governmental organisations, play an active role in the Task Force and its working groups and in preparing and implementing the national action plan. The institutionalised collaboration in this framework between authorities and NGOs ensures a realistic assessment, whether national measures are successful in terms of a victim-centred approach. Likewise, the investigative work of the police and criminal proceedings benefit from the involvement of victim protection institutions from the very beginning. This cooperation has contributed significantly to successful legal proceedings against perpetrators. There are several NGOs in Austria that are actively involved in combating human trafficking. The NGO LEFÖ-IBF (Intervention Centre for Trafficked Women) has a special position insofar, as it acts, unlike other NGOs, on the basis of a government mandate granted under Art. 25 of the Austrian Security Police Act. Accordingly, LEFÖ-IBF is mentioned in the National Action Plan as responsible for the implementation of certain measures. Other players such as the NGO ECPAT Austria, the research institution Ludwig Boltzmann Institute of Human Rights and since 2014 the support institution for male victims of human trafficking MEN VIA, have also become members of the Task Force and important partners regarding the preparation and implementation of the National Action Plan 2015-2017. However, the TF-HT also collaborates closely with other national NGOs and institutions.

Due to the expertise of the Task Force, Austria takes up a competent and active role in combating human trafficking on a European and international level and contributes to and launches several initiatives. Austria intensively collaborates with international organisations including UNODC (United Nations Office on Drugs and Crimes in Vienna), the Council of Europe, the OSCE (Organisation for Security and Cooperation in Europe) and the IOM (International Organisation for Migration). Austria is also actively involved in the network of

National Rapporteurs (Berichterstatter) or Equivalent Mechanisms on Human Trafficking of the European Union chaired by the EU Anti-Trafficking Coordinator.

Up until now, three national action plans have been adopted by the Federal Government (for the period of 2007-2009, cf. item 24 of the Council Resolution Minutes No. 8 of 28 March 2007, for the period of 2009-2011, cf. item 13 of the Council Resolution Minutes No. 10 of 10 March 2009, for the period of 2012-2014, cf. item 20 of the Council Resolution Minutes No. 135 of 20 March 2012). The national action plans reflect the comprehensive approach taken in combating human trafficking and cover national and international coordination and cooperation, prevention, victim protection, criminal prosecution as well as evaluation and monitoring.

The fourth National Action Plan 2015-2017 builds on prior action plans but also includes new elements derived from practical experience, recommendations of the working groups and evaluations by international organisations (in particular the GRETA monitoring mechanism of the Council of Europe).

Chapter I, entitled “National and International Coordination and Cooperation”, deals with activities aimed at further developing the Task Force, strengthening cooperation with the federal provinces and the social partners as well as participation and collaboration in programmes and projects at a European and international level.

Measures contained in Chapter II, entitled “Prevention”, are geared towards raising awareness of the Austrian population and among specifically identified occupational groups of the issue of human trafficking. The chapter also includes activities on strengthening the legal framework for preventive measures. Entitled “Victim Protection”, Chapter III contains activities which contribute to identifying potential victims of human trafficking as well as measures aimed at ensuring the provision of comprehensive counselling, care and support as well as improving the social integration of victims of human trafficking. This chapter also includes specific supplementary measures relating to the protection of child victims. The actions outlined in Chapter IV “Criminal Prosecutions” contain activities for the assessment of existing legal rules (pertaining to the area of criminal law) as well as cooperation between NGOs and law enforcement authorities. Chapter V, entitled “Evaluation and Monitoring”, assesses the measures against human trafficking Austria has taken thus far and aims for extended research in this field.

Austria has implemented important measures in all areas of combating human trafficking. Still, efforts must be consequently continued. Therefore, the next National Action Plan provides for the continuation of training and sensitisation measures and contains the following priorities:

The working group on human trafficking for the purpose of labour exploitation has made significant progress, by, for instance, developing indicators for the identification of victims of labour exploitation. Further activities should build on these efforts. Furthermore, criminal provisions regarding exploitation should be analysed as to their adequacy.

In the field of victim protection, enhanced access to the labour market including qualification measures, compensation and the application of the non-punishment clause will be addressed.

Challenges remain as far as access to compensation for victims of human trafficking, in particular the enforcement of awarded compensation, are concerned. In order to achieve that victims receive the awarded compensation and to prevent perpetrators from benefitting from criminal activities, the possibility of enacting further legal provisions in this area, also in light of international experience, should be assessed.

The work by the working group on child trafficking on a draft instruction manual for the identification and support of victims of child trafficking, which is already quite advanced, should be finalised as soon as possible. The cross-linking and training of all relevant stakeholders, in particular in the federal provinces, should be enhanced.

The Task Force promotes further developing the legal framework and will thus examine potential accession to new legal instruments of the ILO (International Labour Organisation) and the Council of Europe as well as improvement of national laws.

One of the major challenges that remain is to improve the situation in countries of origin. Despite budgetary constraints, further projects and international cooperation against human trafficking must be supported. In light of the still unknown budgetary means for the implementation of the National Action Plan 2015-2017, activities with financial implications may only be implemented according to the financial means available.
